

# **How to Get Rich in the Cryptocurrency Blockchain Movement**

By  
Rick Katz  
Co-Founder [CryptoFundRaiser.com](http://CryptoFundRaiser.com)

Bitcoin. Altcoin. Cryptocurrency. Blockchain Technology. What is this new world we have entered?

According to such reknown experts as Bill Gates, Richard Branson and many others...this is the future.

Bitcoin was only the beginning.

Many early investors and adopters of Bitcoin have become wealthy as Bitcoin's price has risen to where as I write this it is more expensive than gold.

The technology that spawned Bitcoin is called Blockchain Technology.

**According to Business Insider: Blockchains are ledgers (like Excel spreadsheets), but they accept inputs from lots of different parties. The ledger can only be changed when there is a consensus among the group. That makes them more secure, and it means there's no need for a central authority to approve transactions.**

**From Wikipedia:** A **blockchain**<sup>[1][2][3]</sup> – originally **block chain**<sup>[4][5]</sup> – is a **distributed database** that maintains a continuously growing list of **records**, called *blocks*, secured from tampering and revision. Each block contains a **timestamp** and a link to a previous block.<sup>[6]</sup> By design, blockchains are inherently resistant to modification of the data — once recorded, the data in a block cannot be altered retroactively. Through the use of a **peer-to-peer** network and a distributed timestamping server, a blockchain database is managed autonomously. Blockchains are "an open, distributed ledger that can record transactions between two parties efficiently and in a verifiable and permanent way. The ledger itself can also be programmed to trigger transactions automatically."<sup>[7]</sup>

Blockchains are **secure by design** and an example of a distributed computing system with high **byzantine fault tolerance**. **Decentralized** consensus can therefore be achieved with a blockchain.<sup>[8]</sup> This makes blockchains suitable for the recording of events, medical records,<sup>[9][10]</sup> and other **records management** activities, **identity management**,<sup>[11][12][13]</sup> **transaction processing**, and documenting **provenance**.

Blockchain technologies offer a **stigmergy** approach, enabling systematic cooperation in an entirely distributed and decentralized manner.<sup>[14]</sup> They can be considered as hyper-political and global governance tools, capable of managing social interactions on a large scale and dismissing traditional central authorities.<sup>[15]</sup> Blockchain governance may allow human beings evolve to a Stigmergy Age with leaders without orders, order without law,<sup>[16]</sup> **gift** without tax<sup>[17]</sup> and communities without borders.<sup>[18][19][20]</sup>

The first blockchain was conceptualised by **Satoshi Nakamoto** in 2008 and implemented the following year as a core component of the digital currency **bitcoin**, where it serves as the public **ledger** for all transactions.<sup>[1]</sup> The invention of the blockchain for bitcoin made it the first digital currency to solve the **double spending** problem, without the use of a trusted authority or central **server**. The bitcoin design has been the inspiration for other applications.<sup>[1][3]</sup>

Okay, so there's all kinds of descriptions and what not, but what does this all mean to you and I as business people; as investors; as entrepreneurs?

**It potentially means the biggest opportunity to get rich since the beginning of the Internet!**

Blockchain technology is allowing a whole slew of new companies now to come forth that have the potential to be as big as any of the big Internet winners.

What is REALLY incredible is that the door is wide open to literally ANYONE anywhere in the world to build wealth in this industry even with very little capital.

The barriers have been removed that once stood in the way of average people, even those on limited incomes.

How?

Well, there are a number of ways.

One way is by investing in blockchain-based companies through their “coins” or “tokens”.

Many blockchain based companies issue their own coins or tokens that allow people to interact with their platforms or act as a security so you basically own a share in the growth of the company.

For example, a company recently launched named Humaniq released a new token, HMQ, that allows people in parts of the world with no access to banks to save and move money.

This will help people in poor countries who cannot access regular banks and do it via the HMQ coins.

Another new company, on the other end of the spectrum, Edgeless, released a new token EDG which will be used for an online casino where the house has a zero (0) edge. If you're a gambler I imagine that would be quite interesting.

There are two ways to invest: At the Initial Coin Offering (ICO) stage or later on after the coin has been released when it's listed on various coin exchanges like poloniex.com and/or Bittrex.com or others.

Investing at the ICO stage is of course a little more risky.

However it's also when you can potentially buy the coins at the absolute lowest price.

I say potentially, because, there are no guarantees the price won't go lower later on.

But then again ALL investing involves some degree of risk.

Here's the best investing philosophy to follow:

**NEVER invest more than you can afford to lose.**

**Don't invest if you can't bear losing even if you *can* afford to lose.**

**Get wise counsel from multiple wise counselors.**

One of the advantages Pro CFR Members\* have is our closed door conferences where we discuss upcoming ICO's as well as ongoing coin & token opportunities. We try to bring in the opinions of multiple parties to determine which ICO's and other coins have the best potential.

**\*Pro CFR Members are CryptoFundRaiser.com Members who have at least purchased the CFR**

**Elite Membership Package (\$50). They are then Pro Members for Life.**

You can make a lot of money in cryptocurrency, as I mentioned, in coins that are not brand new also.

For example, Bitcoin, although the price is pretty high right now as I write this, some believe it may go 10 to 20, even hundred or thousands times higher!

ETH which is the primary token for the Ethereum Blockchain has risen to over \$200 per token. It was trading at under \$2 just *a little over one year ago!*

One year ago DASH was also trading for around \$2 and as I write this it's a little *over \$300* per coin!

If you had invested just \$100 in Dash one year ago **your \$100 would be worth \$12,000** today! If you had invested \$1,000 in Dash one year ago your investment would be worth **\$120,000** today!

There are SO MANY opportunities like this. Do you see why we're so excited about this new market?

That is why CFR (CryptoFundRaiser.com) has made it a primary function to give our Members access to as much information and education as possible.

We are determined to help as many of our Members as possible reach incredible financial achievements.

I don't know any other opportunities like what are currently available and will soon become available through blockchain technologies.

## **How NOT to get Rich in Cryptocurrency**

Okay, so now that you know how to potentially get rich in cryptocurrency, let me warn you about how NOT to get rich in cryptocurrency..

As with anything good there is also the bad.

What I'm referring to are the cryptocurrency SCAMS.

**Here is how you can recognize a cryptocurrency scam:**

A company is selling a coin or token through an MLM type of compensation plan. The coin or token is the "product".

This type of opportunity is what is known in the stock market world as a **Pump & Dump**.

The price of the coin or token is pumped up through excessive hype and people buying the coin primarily to earn commission on the sale.

It's exactly like the boiler room operations that sell phoney stocks over the phone.

What happens is when people go to actually sell the coin it causes a dramatic and sudden DROP in price.

Unsuspecting sellers end up selling for usually LESS than what they paid instead of the amazing high price they THOUGHT they were going to get!

And that is only IF you're able to even sell the coin. Most likely you'll just be stuck with it.

The ONLY winners in a pump & dump are the owners and their pals.

Another popular cryptocurrency scam is the Fake Investment Scam.

The Internet has had so called HYIP programs forever.

HYIP stands for High Yield Investment Program.

While Internet based HYIP's are all fake, there are real HYIP's in the bond market and that's what fake HYIP's are modeled after, although they aren't anything like real ones.

With real hyip bonds you are investing in real company issued bonds with potential high yields, but again are very high risk.

In Internet HYIP's and in cryptocurrency HYIP's you aren't investing in ANYTHING real. 100% of them are lying to you about earning profits and sharing the profits with you.

They are merely and purely Ponzi schemes that stop paying once they get too many "investors" to pay or the government shuts them down.

They promise to double your investment in X number of days or months. Or they promise to keep paying X percent every day, week or month.

But again they are absolutely scams. No one can guarantee you any kind of return whatsoever and be legitimate. Even real hyip bonds don't guarantee anything.

Eventually when the fake hyip's stop paying (usually within a few months or so, maybe a little longer for some) the payments stop, the excuses start and you're stuck.

My recommendation: **Avoid Pump & Dump and fake hyip's at all costs.**

### **How CFR is Different**

CryptoFundRaiser.com is a community building program that offers outstanding potential rewards.

However, unlike the cryptocurrency scams I described above, how much you earn in CFR is 100% up to you and your Community Team.

We teach you everything you need to know. We coach and train you every step of the way.

We work as a Team and help everyone achieve success!

As your team grows you have the potential to earn an excellent income.

And if you follow our investing/trading education and advice you can potentially earn life-changing, generational wealth.

CFR is an open, transparent platform for serious and mature entrepreneurs and business people.

***Yet, at the same time, it is simple and easy enough for even beginners to achieve success.***

## **The CFR Plan to Build Life-Changing Wealth**

Our plan is very simple.

1. Build your investment capital via the Community Builder Rewards Platform.

2. Learn how to earn by investing in great blockchain-based companies, coins and tokens.

All of this is available to you as a CFR Pro Member!

To Your Life-Changing Success!
